EDITORIAL

This is the combined XXVIII/XXIX Volume of the Journal of Food Physics, and as You know the first issue was published in 1988, almost 3 decades ago. Many thanks for your kind help, cooperation, support and understanding the editors during this period of not easy existence.

We are sure, also this issue gives the opportunity for the readers to get interesting and useful information about some special questions of food physics. The topics of the scientific articles cover the following fields: differentiation and integration in natural science, drying kinetics, rheological parameters, food rheology, nutritional value, physics experiments in grammar shools, statical compressive properties, centrifugal freeze concentration, sensory characteristics, effect of the soaking pretreatment, starch gelatinization.

These papers were reported as lectures at the ISFP Debrecen Conference, 2016. As You probably know or remember the

first conference we organized in Budapest, Hungary, 1994, followed by the second one in Bucharest, Romania, 1996. The place of the third meeting was Poland, Lublin, 1998, and in 2000 we met in Turkey, Istanbul. Later we decided to organize the conference in Brno, Czech Republic, 2002, and 2 years later, in 2004 we came back again to Hungary, but the place was Pecs. The 2006 meeting we had in Serbia, in a beautiful small town, Senta, and the next one in Plovdiv, Bulgaria, 2008. The place of the 2010 conference was Nitra, Slovakia, then in 2012 Budapest, and again in Plovdiv, 2014. We will be really happy to have the possibility to continue the organisation of the ISFP conferences, the next conference will be organized in Turkey, 2018.

Read and enjoy this issue! And please - if You can -support the Food Physics Public Utility Foundation! We need help and donations for existence.

Andras S. Szabo
