

Balkan Geophysical Society hírek

Dear Colleagues,

I hope this email finds you well. Also, I hope that the 12th Congress of Balkan Geophysical Society held at Kopaonik mt., Serbia, will remain in your memory not as a gathering with a large number of participants, but as a nice opportunity to gather geophysicists from the Balkans and the world and share positive energy and knowledge. As you all know, presidency of the Balkan Geophysical Society (BGS) was officially transferred from Serbia to Hungary and the next Congress will be organized by the Hungarian Geophysical Society.

Now, I am glad to share good news with you – all extended abstracts submitted for presentation at the BGS Congress (and accepted by the Scientific Committee) are included into the EAGE EarthDoc. You can find them at:

<https://www.earthdoc.org/content/proceedings/bgs2024>

Thank you, Marcel and Ilaria!

Thank you All for participation (including online participants, too) and support! Thanks to you, the congress emphasized the importance of each of us for a sustainable, inclusive and growing future - to work together towards positive change, as well as to show that young people are also essential for the development and continuation of such events.

And for the (happy) end of this letter – please find attached a booklet *PIONEERS IN GEOLOGY*, dedicated to distinguished colleagues who established Geoscience and Geophysics in Balkan countries and published by AGES – in the framework of the 12th Congress of the Balkan Geophysical Society *GEOPHYSICS FOR THE BETTER WORLD*. The authors are: Dr. Marjan Delipetrev (N. Macedonia), Đorđe Maroš, Branislava Radišić, Dejan Bajić, Jelena Jovančov, Jovana Vukobrat and Aleksa Babić (Serbia). Enjoy!

Wishing you all the best and see you at the 13th BGS Congress in Hungary!

Kind regards,
Snežana Komatina,
President/Founder of AGES
